Stay Ahead with Immediate Task Notifications

We're excited to announce an important update to our quoting platform that can significantly streamline your workflow—automatic subscription notifications!

While you've automatically been set up for daily notifications, we encourage you to change your settings to receive alerts in real-time. If you previously had subscriptions set, please review your settings, as the system-wide update may have reverted them to the daily option. This update is especially beneficial when waiting for critical tasks like underwriting approvals, ensuring you are always informed and can act without delays.

To help you get started, we have prepared a 2-minute video tutorial that provides step-by-step instructions on setting up subscriptions.

[Watch Tutorial on Setting Up Subscriptions](#)

We've also included a handout [All About Tasks and Notifications](#), which outlines different task types and strategies for effectively managing them in your inbox.

Instructions on Setting Up Subscriptions can also be found in the [Service Guide](#) available in the Velocity Knowledge Center.
